

COOLMASTERNET

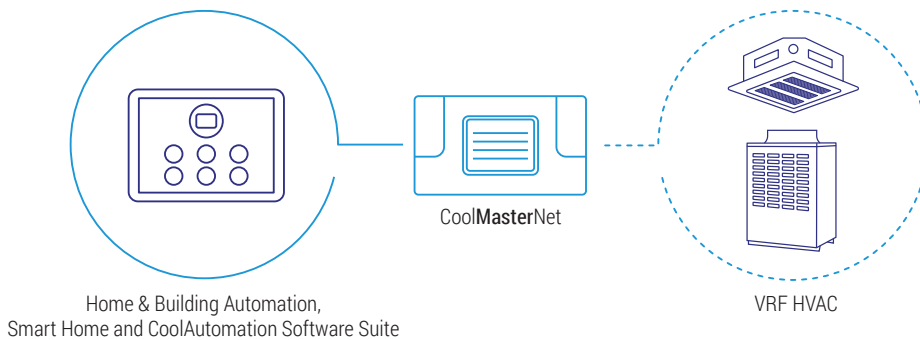

CoolMasterNet is a device that enables seamless and universal integration of Home Automation Systems, Building Management Systems, and Cloud Control Applications with any VRF or VRV HVAC system.

CoolMasterNet provides automation integrators, facilities managers, service providers, and HVAC professionals with the ability to control, monitor, service, and manage any VRF or VRV system through the creation of a universal communication channel between the HVAC and automation systems. CoolMasterNet is a plug & play device. Simply unbox it and plug into your VRF or VRV HVAC System.

CoolMasterNet enables VRF and VRV HVAC connectivity to:

- CoolAutomation Software Suite
- Any Home & Building Automation System
- Smart Home Devices

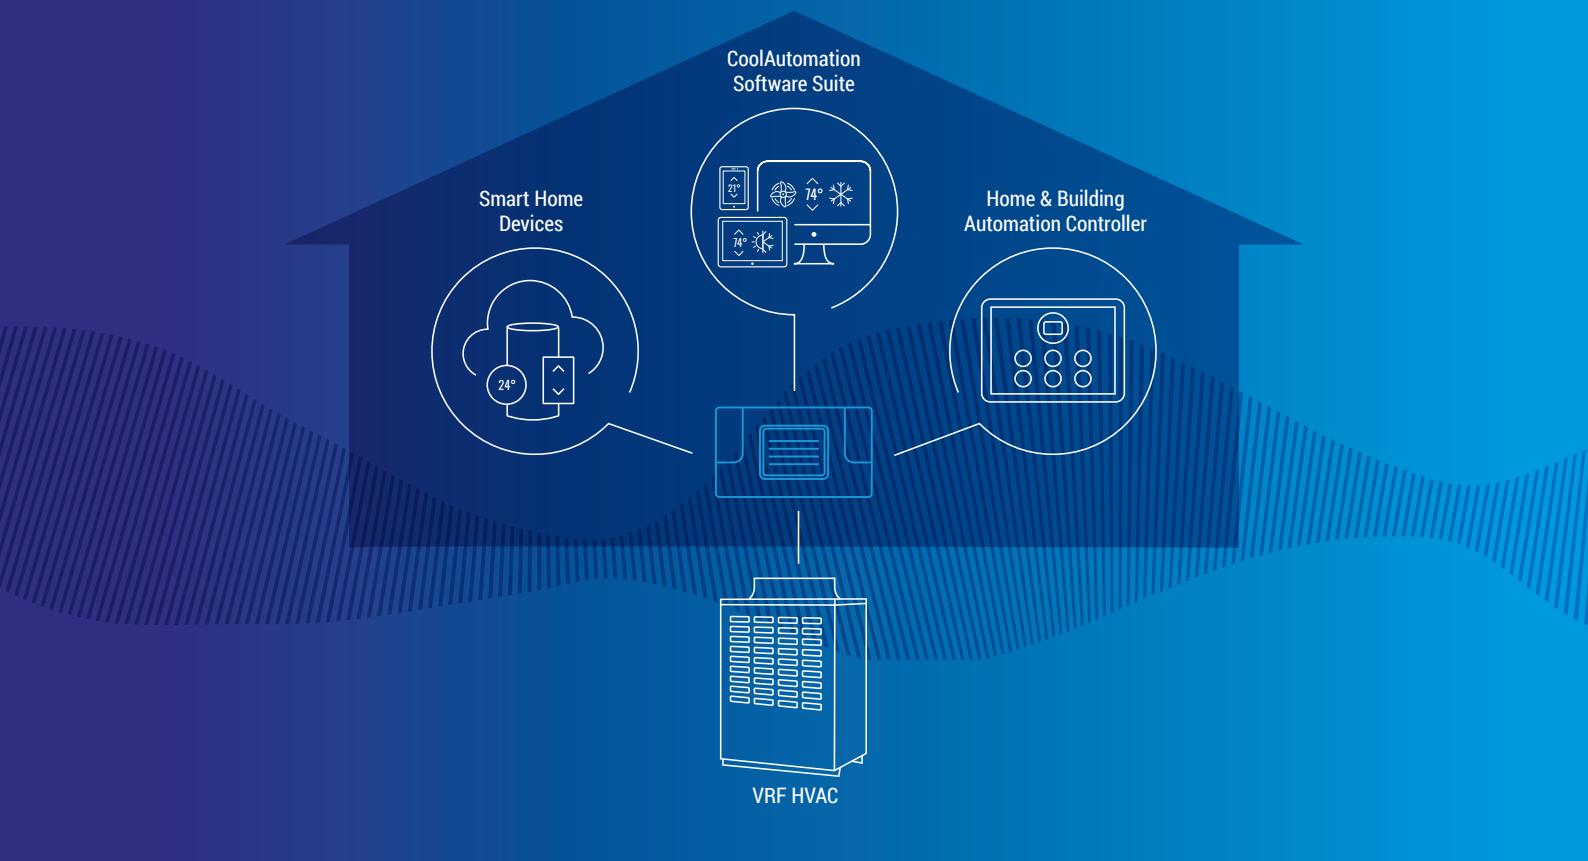

BENEFITS

Integration with the CoolAutomation Software Suite which includes: Facilities Management, Monitoring, and Servicing Applications

Support for all VRF HVACs, including: Daikin, Gree, Hitachi, LG, Mitsubishi Electric, Mitsubishi-Heavy, Panasonic/Sanyo, Samsung, Toshiba, Fujitsu and many others

Native integration with all Home Automation and Building Management Systems

Native cloud integration with the most popular smart home devices, including Google Assistant, Nest, and Amazon Alexa

FEATURES

Interfaces via RS232 RS485, Ethernet, KNX, or physical layers for all HVAC brands

Native cloud integration API for all brands of Home Automation

Communicates through Open Proprietary ASCII, MODBUS RTU, BACNET MSTP, BACNET IP, and REST API protocols

Automatic driver detection and installation for all Home Automation systems

Configurable I/O's

Touch screen display for simple and intuitive configuration

ABOUT US

CoolAutomation is the industry leader of Internet of Climate (IoC) technologies and HVAC automation.

The Internet of Climate (IoC) is a universal concept designed to enable any HVAC climate system to be simply and reliably integrated with automation systems. These devices are the next evolution of IoT technologies and are crucial to any professional within the home and building automation, HVAC, or facilities management industries.

CoolAutomation's proprietary combination of hardware and software solutions for HVAC systems, create a platform to enable cloud-based remote Monitoring, Diagnosis, Servicing, and Control within the residential, commercial, and hospitality industries.

CoolAutomation is a global company with thousands of clients and distributors located throughout over 90 countries.
